experience

2022 - 2026

MCKINSEY & COMPANY

BOSTON, MA

2025 - 2026

Engagement Manager

Led 0-to-1 AI product development as sole Product Manager for 10+ person cross-functional teams

Developed agentic copilot for 5,000 relationship managers with \$35M projected benefits

- *Customer needs discovery*: Conducted 20+ user interviews and focus groups, identifying opportunity to help RMs engage customers efficiently by reducing 30 minutes of outreach prep time to <5 minutes
- *Product tradeoff decisions*: Increased suggestion acceptance rate by 30 p.p. through setting a threshold on response confidence, trading off suggestion frequency for higher user trust level and adoption
- *Business case sizing and presentation*: Identified \$35M value capture opportunity from increasing customer-facing time and reducing admin costs, securing C-suite funding to scale the product

Built AI-native customer service agent for a major insurer, projected to reach 1M+ users

- *Problem definition*: Set product vision to tackle customer frustration from low-quality chatbot responses, especially on policy coverage inquiries, based on insights from 20+ user interviews
- *AI product optimization*: Discovered problems with generalist-agent architecture failing reliability thresholds; enhanced RAG with sub-agent routing, improving self-service resolution by 10 p.p.
- *Product roadmap*: Created a multi-year roadmap endorsed by executives, identifying 8 prioritized capabilities to add to the agent based on potential impact, technical feasibility, and customer feedback

Turned around 4 months delay in product modernization effort for a Fortune 100 company

- *Agentic tool creation*: Increased requirements development throughput >8X across 10+ product owners by building agentic tools converting legacy product documentation into epics and user stories
- *Feature prioritization*: Unblocked development delays by reprioritizing roadmap, cutting bottom 40% low-value nice-to-have features, and resolving 30+ cross-functional blockers
- *Data-driven decision-making*: Reduced decision turnaround time from >20 days to 7 days by launching a real-time Tableau decision dashboard and defining 9 north-star decision criteria

2022 - 2025

Senior Business Analyst / Associate

BOSTON, MA; HONG KONG

Earned top 5% ratings in every review and a fast-track promotion 6 months ahead of standard timeline

Led customer experience transformation creating 10%+ growth in priority customer segment

- *Growth experimentation*: Launched a new customer acquisition program with value propositions selected from 10+ A/B tests, resulting in 3X conversion vs. past campaigns

Redesigned customer journey for a financial services application with 10 p.p. CSAT improvements

- *Customer pain point resolution*: Identified 5 key friction points in existing journey through 5+ focus groups, led 10+ ideation sessions to generate ideas such as targeted onboarding and personalized feed

technical

Python, Java, SQL, Tableau | Figma, Jira, Miro, Confluence | Claude Code, Codex, Cursor
